IMFA RT-MC

DJ AIde | Intelligent Assistant

—— Unmanned Intelligent Lighting and Shadow Control System

As a DJ Intelligent Assistant, DJ Aide was pioneered by Playeah and specially desi gned for DJ controllers. It utilizes Playeah's original "IMFA" and "RTMC" technol ogies to intelligently perceive music metadata.

Using music as the link and metadata as the basis, it generates control meta-commands. These commands are used to control the light console and video server based on song se gment information. Additionally, it employs time code (LTC) to achieve highly synchron ized audio-visual experiences.

Schematic Diagram(Before &After)

FEATURES

- IMFA+RTMC Controls the Lighting Console
- IMFA+RTMC Controls the Video Server

Model: DJ AIde			
Processor:	LTC Output	LTC Interface	Disk Capacity
Intel 64bit 2core CPU	1 Channel	1×3.5mm Audio Jack	128GB
RAM	Control Protocol	USB Interface	Power Input
8GB	OSC、TCP、UDP、Telnet	2×USB3.0/4×USB2.0	DC12V-3A
Network Interface	Monitor	Size	Weight
1 × RJ45	1× HDMI	196.5mm×198mm×45mm	0.98kg
